[Cufflinks](#)

We believe that we are producing the finest Silver Jewellery ammonite cufflinks in the world giving you, the customer, the best value possible.

A whole ammonite is sliced, polished and clasped by either:

18 carat white gold on 925 silver

or

gold plate on 925 silver

or

rhodium plated 925 silver

to create a pair of swivel-backed Silver Jewellery cufflinks.

The cufflinks are silver rhodium plated to maintain the polished condition of the silver indefinitely so that it cannot tarnish. Each pair is hand set in Birmingham's Jewellery Quarter and is presented in a wooden gift box. This is a perfect gift for any gentleman.
